About

As SVP and GM, I lead AMD's Client Business Unit, responsible for all aspects of product strategy, management and engineering for client computing products and solutions.

I joined AMD in 2012 as general manager of the AMD Semi-Custom Business Unit, which grew from infancy to a multi-billion-dollar business. I then spent two years leading product and platform engineering operations.

As an experienced executive with more than 30 years of engineering and operations leadership experience, I have a strong track record of driving product development and business growth for semiconductor companies, including Trident Microsystems Inc., LSI Logic, C-Cube Microsystems and VLSI.
